

PARASOUND

NewClassic HDR77 *High Definition Surround Receiver*

Parasound is proud to announce our first surround sound receiver. 28 years of experience producing some of the industry's finest preamplifiers, power amplifiers and surround sound processors has come together in the NewClassic HDR77. Packed with state of the art video and audio processing, the HDR77 is ready to be the heart of any high definition theater.

Theater power is 130 watts x 7 channels with a simultaneous second zone power output of 30 watts x 2 channels. A wonderfully uncomplicated front panel and intuitive setup menu make operation and integration easier than any AVR you have seen before. Automatic room calibration and equalization with THX Ultra2 processing ensures an experience that will surpass your highest expectations.

The powerful RS-232, IR and 12V trigger features are designed for easy system integration. All this is backed by Parasound's incomparable technical support.
