Parasound RMAF 2019 Reviews

Richard Schram and the entire Parasound team offer a sincere “Thank you” to all who visited us at the 2019 Rocky Mountain Audio Fest. The show was a smashing success for all involved in the effort. We enjoyed the show immensely, and we hope you did, too. We displayed both our premier Halo electronics, and our latest value engineering achievement, the NewClassic 200 Integrated Amplifier / DAC (now shipping). Consumers and reviewers alike repeatedly told us “This is one of the best sounding rooms at the show, regardless of cost – and the best value for the money”.

We want to acknowledge our valued partners without whom we could not have created such a compelling and rewarding audio presentation: Tekton Designs, and their high-value Moab speakers; Straight Wire cables; ClearAudio turntable and, of course, our supporting dealer, Don Walker Audio out of Grand Junction, Colorado .

We also premiered Parasound as the exclusive domestic distributor of NorStone Design equipment racks and speaker stands.

We are delighted so many members of the press visited us (and several re-visited!). It was rewarding to spend time with all of the reviewers who covered our room.

Links to their much-appreciated coverage are compiled below for your convenience.
